Rich Noonan architect

Higgins Building

an historic renovation

Missoula, Montana - 1983

The Higgins Building sits on a prominent corner in Missoula's downtown. We gutted and refurbished the entire interior; cleaned, remodeled, and restored the exterior. I headed the design of the "new" storefronts and fenestration along with the grillwork on both sides of the building as it wraps around the bank in the corner.

Quality Suites Hotel

A proposal for a hotel

Sea -Tac Airport 1986

Unfortunately, the proposal was terminated due to wetlands impacts on the proforma. I headed the design team on this project which led to the promotional perspective for the financing package.

Swedish Hospital Entry

Multi-level connection
of three buildings

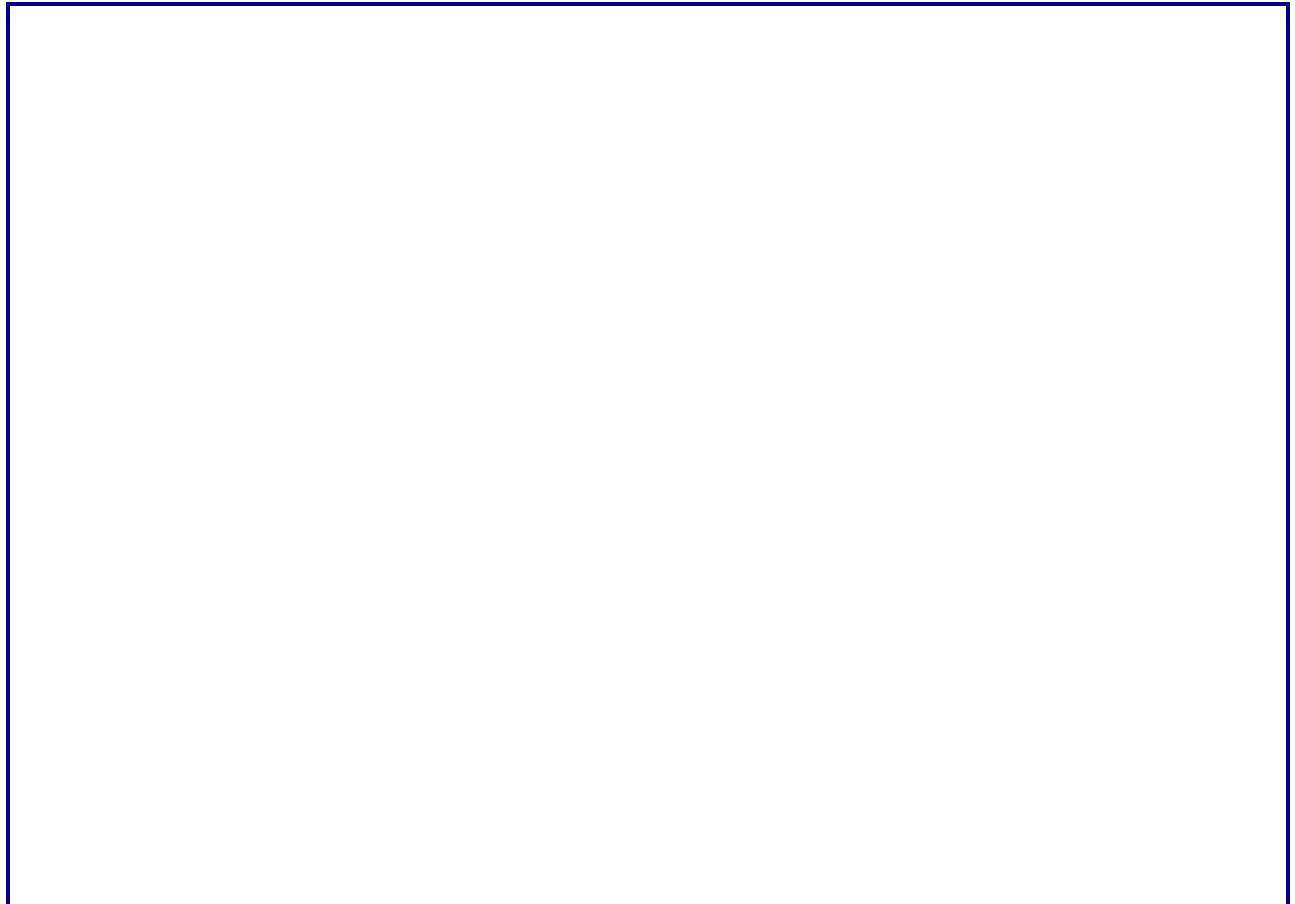

Seattle, Washington - 1983

This is a complicated multi level connection of three buildings that transect the main Swedish Hospital campus entry. The space is a multi dimensional intersection of vehicular traffic and five major levels of pedestrian traffic; some interior and some exterior. The subterranean levels house storage and highly technological medical imaging equipment. I handled the design of the two buildings connections along with the transverse escalators.

Lake Meridian Marketplace

150,000 sqft of retail space

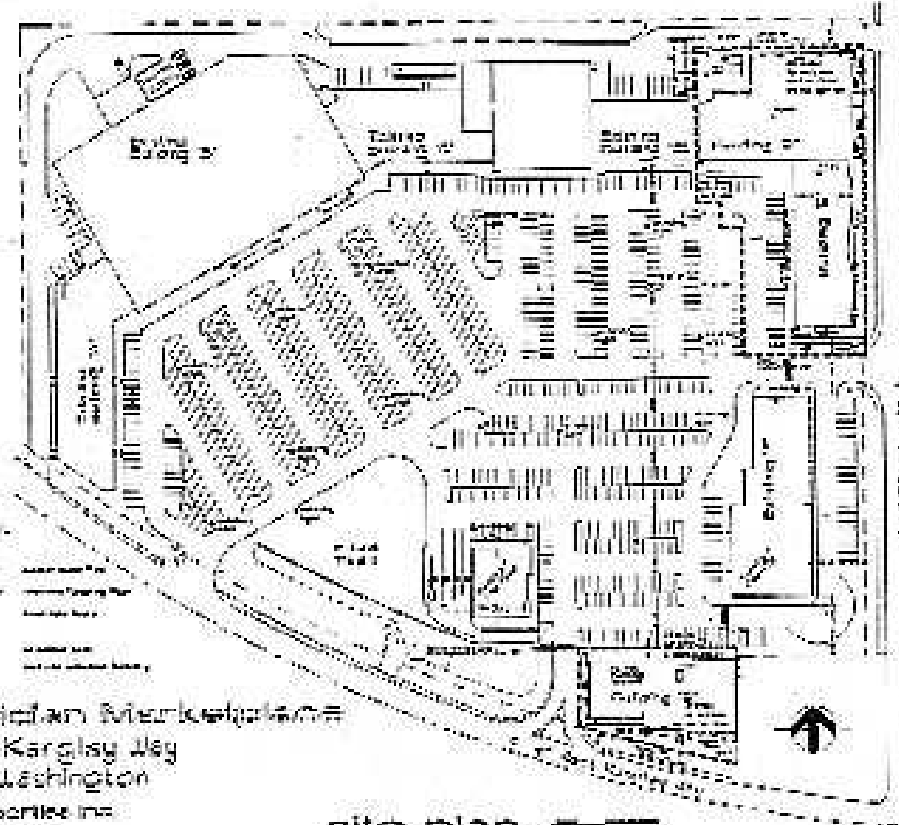

Kent, Washington - 1991

The shopping center sits on 14+ acres. The project was phased as tenants signed on for the pads and ancillary buildings. The pre-design discovery encountered issues that spanned the gamut from wetlands, EIS, adjacent landholders' petroleum contamination, sewer and water shortfalls, to list a few. I was the Project Architect for the project and most of the tenant improvements. The project spanned three years due to the phasing.

anchor tenant entrance

Judson Residence

3,500sqft single family residence

Seattle, Washington - 1989

The owner removed an existing 1,200 sqft SFR from this long sloping forested lot to reconfigure a larger home with abundant landscaping of the outdoor “rooms”. A few trees were saved. The house presents a formal façade to the street juxtaposed to the more serene backyard in keeping with the clients’ desire for privacy.

Urban Zoo

philosophical visions of cages

internal thought - 1976 to present

The graphics from a discussion about cages; cages as homes, as places of learning, as limits to our confinement. Self imposed limits or self-liberating limits: we are consistently incarcerating others in order to expand some facet of our own cage.

Woodland Park Zoo

a civic band shell

Seattle, Washington - 1994

The multi-use structure houses musical performances, lectures, artifact presentations and many other performance art events. This is a \$55,000 facility designed and built with donated materials and services for an actual total cost of \$3,000

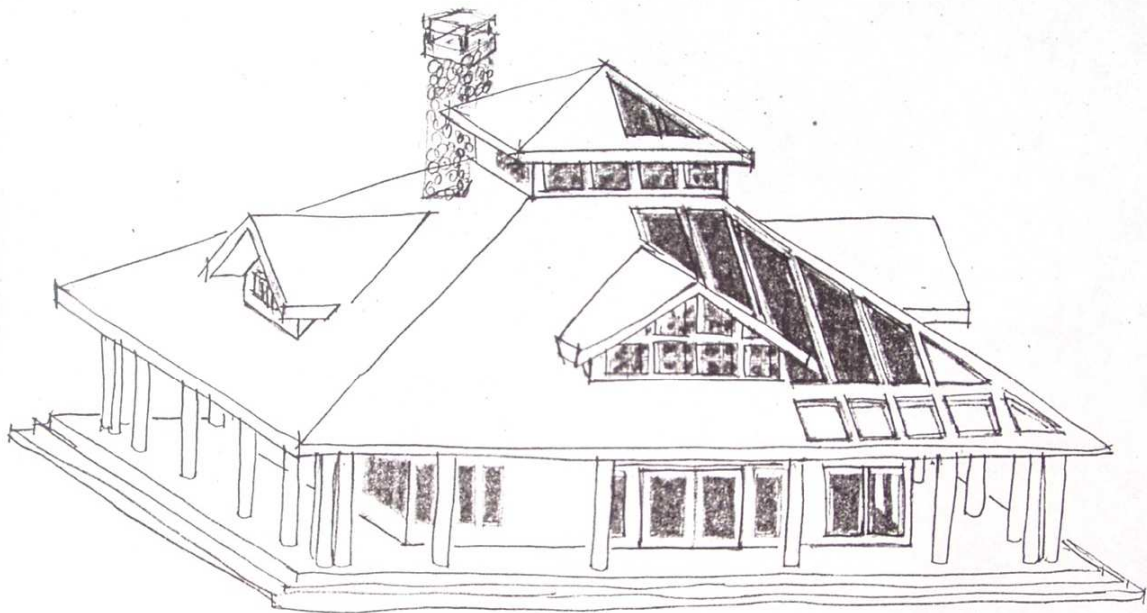

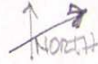

Elk Hallow

1,800 sqft residential retreat

Grassy Mountain Ranch, Montana - 2000

An 1,800 sqft main house for the retreat and a detached garage with a 600 sqft guest house looking out over the Bridgers and the Crazy Mountains

Breezeway

Residential remodel

Bozeman, Montana - 2004

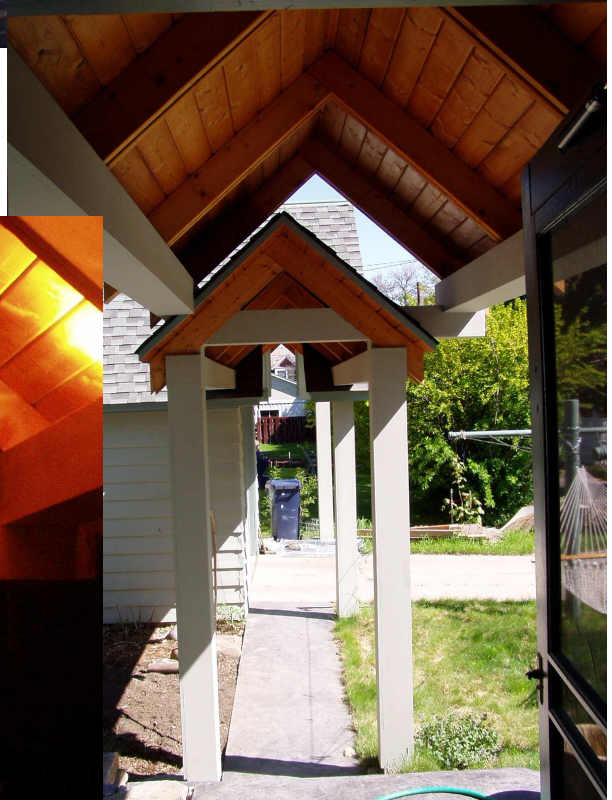

Redesigned and reconstructed a dilapidated garage connection to the house. The new breezeway pulls from the house's massing and vocabulary and incorporates it into the connection.

Breezeway

Residential remodel

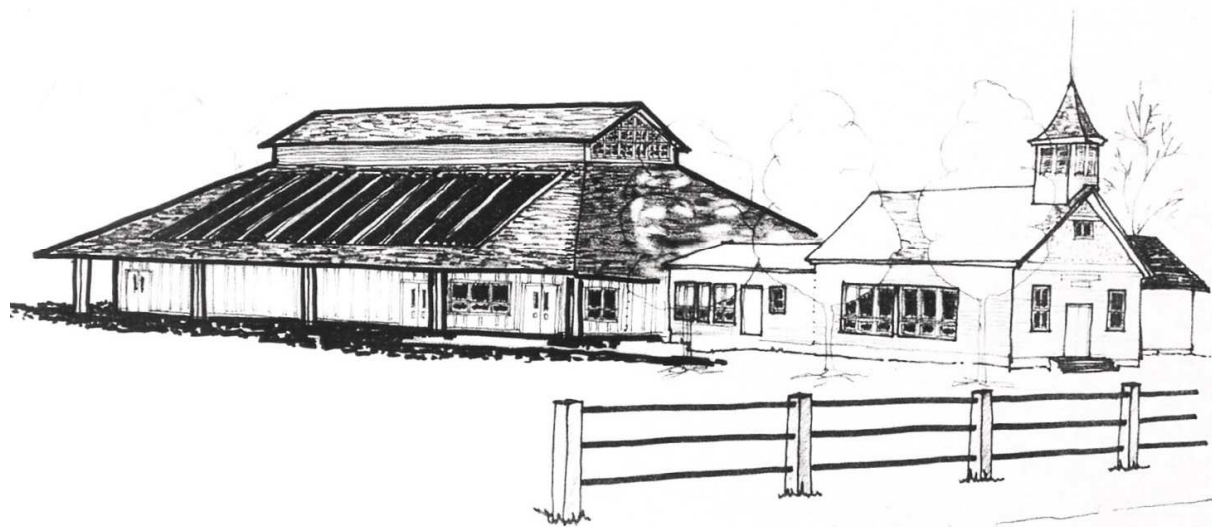

Pine Creek School

a multi-purpose building
and campus planning

south of Livingston, Montana - ongoing

The board wants a new multi-purpose gym / activity center and classroom building to compliment without dominating the existing 100 year old schoolhouse.

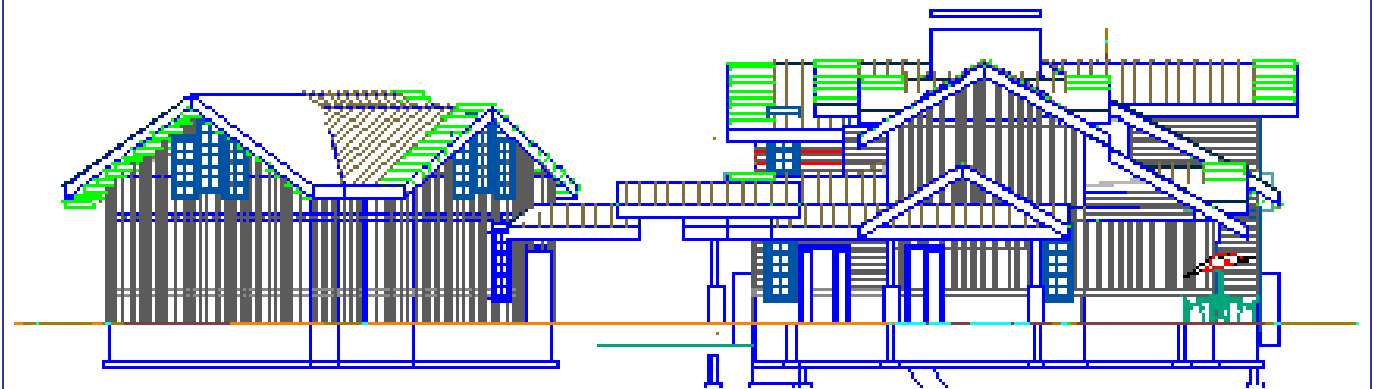

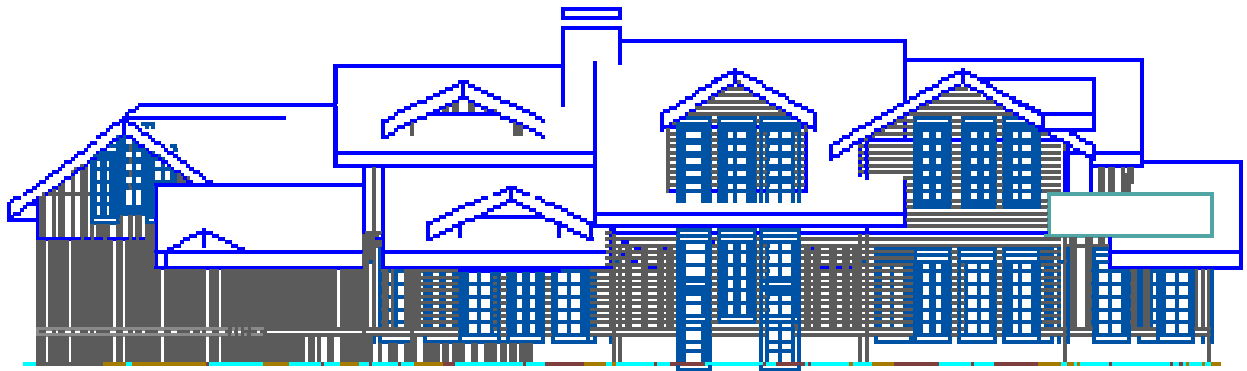

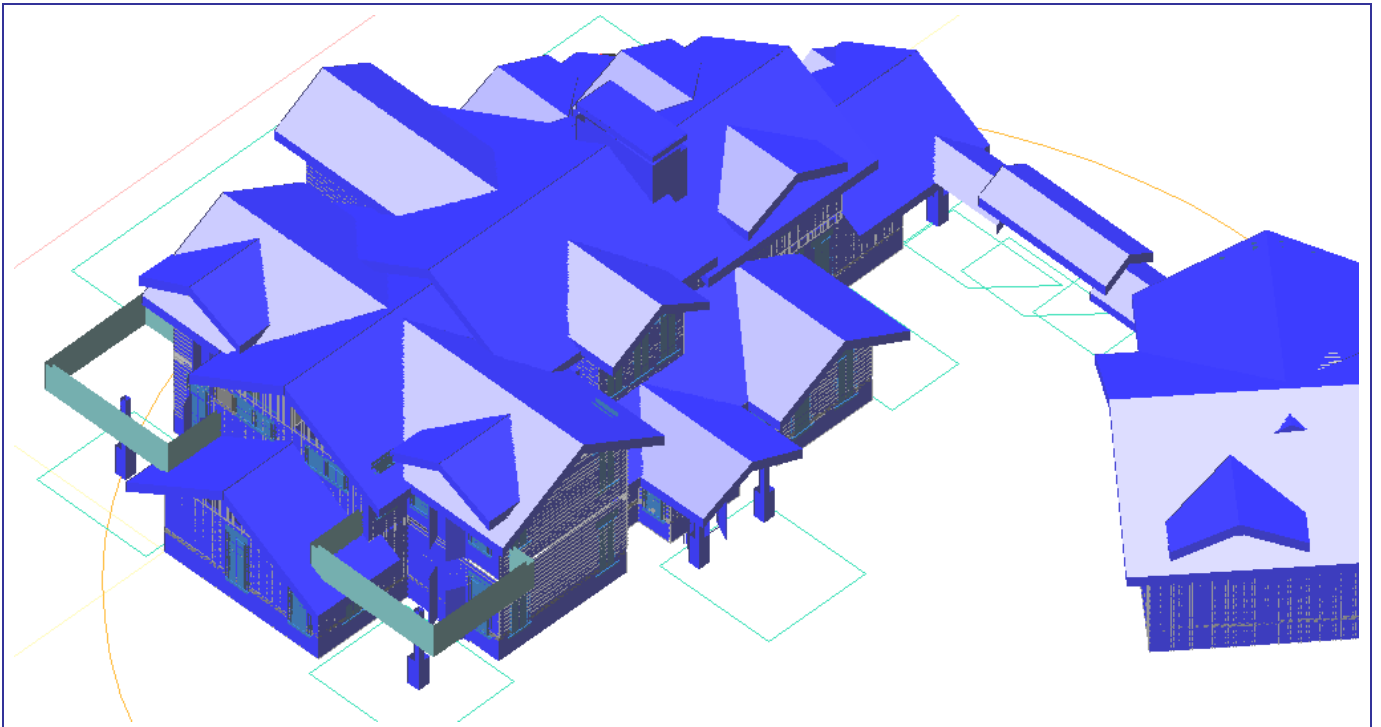

PINE CREEK SCHOOL
Rich Noonan ARCHITECT

Wallace Manor

4,000 sqft single family residence

Bozeman, Montana - ongoing

The residence south of Bozeman is constrained by the subdivision covenants and design review. The client is looking to capitalize on the market trends of today with multiple bedroom suites; ample entertainment spaces and a large entertaining kitchen space.
